

April

Flamingos have long s-shaped necks and tall, skinny legs that make them look like they're standing on stilts!

29  <p>Spring's Pink Moon</p>	30	<p>When we see a full moon, the moon is on the exact opposite side of the earth from the sun. April's full moon is known as the Pink Moon, but don't expect to look up in the sky and see a pink moon! Native Americans gave the spring moon its name because of the pink phlox flower which begins blooming at this time of year, throughout the United States and Canada.</p>
