

Danny's Tadpoles

Level D / 69 words / informational fiction

High frequency words:

at, are, one, put, this

Before reading

- Look at the cover and read the title.
- Possible discussion questions: "What do you think Danny is looking at in the bowl? What do you know about tadpoles?"

Look through all the pictures

- Using the language in the story, discuss what is happening in each picture.
- Help the children find the words that may be new to them: *lettuce* and *tadpole*. Have them clap and count the syllables in these multisyllabic words.

Reading the text

- Have the children read the text independently. Encourage them to read it again if they finish before the others in the group.
- While they're reading, listen to each student individually and prompt them to use meaning, structure, and letter cues at difficulty. Praise the successful use of reading cues.
- Make sure the children can match (with their finger) or track (with their eyes) each word of the text.

After reading

- Discuss the meaning, structure, and letter cues that you notice students using correctly.

FUN FACT

When Darwin's frog tadpoles hatch, a male frog swallows the tadpoles. He keeps the tiny amphibians in his vocal sac to allow them to grow. After 60 days, he then proceeds to cough up tiny, fully-formed frogs.

- **Literal comprehension:** The answers are in the text. Ask, "During what season of the year did Danny find tadpoles? What do tadpoles like to eat?" Have students read the pages that support their answers.

- **Inferential comprehension:** The answers are in your head. Ask, "Have you ever watched a tadpole change into a frog? Why do you think frogs do not keep their tails?"

Word work

- Have students locate the high-frequency words in the text and practice writing them.
- Help students find the word *frog* with the *fr* onset. Discuss and list more words with the *fr* beginning sound (*free, fry, frown, fruit*).
- On separate cards, write each stage of the frog's life cycle: *egg; tadpole with tail; tadpole with tail and legs; tadpole with tail, legs, and arms; tadpole with legs, arms, and shorter tail; frog*. Have the students put the cards in sequential order to match the text and the Frog Life Cycle illustration.

Rereading for fluency

- Have the children read the story again, either independently or with a partner.
- Use this opportunity to listen to each child and again prompt for strategy use at difficulty.

Writing activity

- Have each student write and complete the following sentence: "One day I looked at the tadpole. The tadpole grew _____." Then have them draw a picture that corresponds to what they have written.

Teaching Points: Introducing new words; Finding and clapping multisyllabic words; Practicing the *fr* onset; Introducing the Frog Life Cycle; Sequencing; Rereading.
