

March

bitter

sour

umami

salty

sweet

water

Although different parts of the tongue are more sensitive to certain tastes, there are overlapping taste buds all over the tongue. People have around 9000 taste buds, while dogs only have 1700. Dogs don't have taste buds that are sensitive to salt, but they do have special taste buds for water, that people don't have.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
1	2	3	4	5	6	7
8	9	10 	11	12	13	14 
15	16	17 	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

Our sense of taste evolved to help us choose which foods were good to eat. Choosing the wrong food could mean poor nutrition or poisoning from eating something that would harm our bodies.
